

Parth Pokharel

Kathmandu, Nepal | pokharelparth9@gmail.com | [linkedin.com/in/parth-pokharel](https://www.linkedin.com/in/parth-pokharel)

Professional Summary

AI & Data Science-focused BCA student with hands-on experience in Python, data analysis, and machine learning foundations. IBM-certified in Python for Data Science, Data Analysis, and Statistics. Experienced in building data pipelines, automating workflows with Python, and translating data insights into actionable decisions. Passionate about developing real-world AI/ML systems and contributing to impactful, data-driven projects.

Technical Skills

Languages & Tools: Python, SQL, JavaScript, Excel, Bash
Data & ML Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, NLTK
Concepts: Machine Learning, Statistics & Hypothesis Testing, Data Cleaning, Feature Engineering
Other: Full-Stack Web Development, SEO Analytics (Google Analytics, SEMrush), Canva

Projects

Sentiment Analysis on News Headlines *Python, NLTK, Scikit-learn*

- Scraped and preprocessed 1,000+ news headlines; performed text normalization, stopwords removal, and tokenization using NLTK.
- Built a TF-IDF + Logistic Regression classifier; evaluated model using precision, recall, and F1-score.
- Visualized sentiment distribution with Matplotlib; deployed a simple CLI interface for real-time predictions.

Student Score Data Analysis Dashboard *Python, Pandas, Matplotlib*

- Cleaned and analyzed a dataset of 500+ student records; identified score trends across demographics using statistical methods.
- Built exploratory visualizations (heatmaps, histograms, box plots) to surface key performance drivers.
- Applied hypothesis testing (t-tests) to validate performance differences between student groups.

Python Automation: Excel Reconciliation Tool *Python, OpenPyXL, Pandas*

- Developed Python scripts to automate monthly transaction reconciliation for 200+ records, reducing manual errors by 95%.
- Automated report generation, cutting processing time from 4 hours to under 10 minutes.

Professional Experience

My Career Nepal – SEO & Data Analytics Executive *Kathmandu, Nepal*
Search Engine Optimization Executive *July 2024 – January 2025*

- Leveraged Python scripts and Google Analytics/SEMrush APIs to automate reporting; increased organic traffic by 45% in 4 months.
- Built data-driven performance dashboards translating complex metrics into strategic insights for leadership.
- Reduced site bounce rate by 25% and grew qualified audience reach by 30% through UX and content optimization.

UpSkills Nepal – Content & Data Writer *Remote*
Web Content Writer *April 2024 – June 2024*

- Produced 60+ data-backed articles on technology & AI topics, reaching 20,000+ monthly readers with 35% higher engagement.

PB Group – Finance & Data Automation *Kathmandu, Nepal*
Assistant Accountant *January 2022 – September 2022*

- Maintained 200+ monthly transactions using Excel and Python automation; supported NPR 5M+ month-end close with 95% error reduction.

Education

Kantipur City College *Kathmandu, Nepal*
Bachelor of Computer Applications (BCA) – 3rd Year *2022 – Present*

Certifications

- IBM:** Python for Data Science · Data Analysis with Python · Statistics 101 *Aug-Dec 2024*
- LinkedIn Learning:** Introduction to Prompt Engineering for Generative AI *Nov 2025*
- Google:** AI-Powered Performance Ads Certification *Nov 2025*

- **Forage:** Software Engineering Job Simulation (Electronic Arts) · Cybersecurity Job Simulation (Mastercard)
- **freeCodeCamp:** JavaScript – Algorithms & Data Structures
